

CONTENT

DEVELOPMENT OF MINERALS

Antoshchenko N. I., Filatyev M. V., Chepurnaya L. O. Determination of the empirical coefficients to predict the dynamics of the Earth's surface displacement during mining coal seams.....	6
Bondarenko V. I., Fomychov V. V., Sotskov V. O. Peculiarities of the computer experiment usage in elastic plastic position for Western Donbas conditions.....	15
Litvinsky G. G., Fesenko E. V. Reasons for design and parameters of box profile frame support.....	22
Sadovenko I. O., Inkin O. V. Environmentally safe increase in gas production from permeable rocks of Ukrainian deposits.....	30
Klishin N. K. The calculation of rock lamination at the computer modeling by state of stress-strain rock in the neighborhood longwall face.....	39
Korneev S. V., Dolgikh V. P. Mooney Rivlin coefficients in the ANSYS programme package, obtained for tuck rubber mine conveyer belts	44
Kryzhanovskiy Y. Y., Antoshchenko N. I., Filatyev M. V. Role of the surface boreholes in gas balance forming when mining the coal seams at the deep levels.....	49
Korobkin S. G. Definition of the optimal face-end support scope in the conditions of fissured strata	56
Kryzhanovskiy Y. Y., Antoshchenko N. I., Filatyev M. V., Gasyuk R. L. Methane Disengagement Correlation in Working and Degassing Wells When Refining Bearing Coals Seams	60
Rutkovsky M. O., Rutkovsky O. Y. Workload estimation in mine winder hoisting drum.....	69
Kasyan S. I. Factors influence on the deflected mode around the preparatory development within the lava's affected zone.	75
Tretiak A. V. Theoretical study of the origination process of tension static jump in the stopped conveyer belt while changing its conveyance length	81

METALLURGY

Karpov A., Semiriahin S., Novokhatskiy A. Analysis of coal concentrate quality index effect on strength power of coal coke	88
Semirygin S. V., Dorogoy Y. V., Kuznetsov D. Y. The estimation of the prospects extension of raw material source for the ferrous metallurgy by involvement coal mining waste in the production.	94
Borovik P. V. Three-dimensional simulation of round profile separation process with shears.....	102
Shubin Y. P., Brovender Y. M. Distribution of Addition Elements in Copper Melting Process.....	107

CONSTRUCTION

Dolzhikov P. M., Zbitskaya V. V. Analytical research of the bearing capacity of continuous flight auger (CFA) piles	114
---	-----

Pozdeev S. V., Otrosh Y. A., Omelchenko A. N., Shchipets S. D.

Technique of limit estimation of the fire-resistant ferroconcrete beams by the interpretation of the fire tests results 119

Paleychuk M. M., Ryzhikova O. O.

Stress-strain state of the hydro-storage device in the formation of soil deconsolidation zone investigation..... 128

ELECTRICAL ENGINEERING. RADIOTECHNICS**Zablodskiy N. N., Pliugin V. E., Gritsyuk V. Yu., Fetisov I. V., Rovenskaya A. K.**

Multigradient of fields in the array of rotor screwing electromechanical converter 136

Zablodskiy N. N., Gritsyuk V. Yu., Zablodskaya T. P.

Modelling of three-dimensional electromagnetic field distribution in the active part electromechanical disintegrator 142

Sheremet A. I., Sadovoy A. V., Sohina Y. V.

The notion of discrete time equalizer..... 147

Murga V. V., Antropov I. I., Gamazin D. K., Aklib A.

Changes in the microstructure of steel during processing in a plasmatron with a liquid cathode .. 152

Kukharev O. L.

Condensator battery mode in the system of ferroalloy plant power supply research 157

Requirements to scientific articles in Collection of Scientific Papers of DonSTU 171
